Astro Flipping Vs. Wholesaling

While Astro Flipping might look similar to wholesaling, it isn't. Astro Flipping is a concept that promotes a *flipping pitch*. You seek to focus on

purchasers/investors for their properties for all wholesales in the city and then apply a slight discount on any switch. Essentially, it is co-wholesaling. Wholesaling is the practice of rapidly buying and selling houses and sell to investors or buyers, typically far below the market value (the word wholesale). You will be associated with another wholesaler so that you will be taking part in a portion of each flip. For Astro Flipping, however, you will get the entire charge from the wholesale property for yourself. The presumed advantage of Astro Flipping is that you can eat at “everyone’s table” as opposed to wholesaling where your profit is limited to the properties bought or sold.

Final Thoughts

Astro Flipping is the next big thing in real estate. You seek to find buyers for a property from all the wholesale individuals in your area, and you apply a small markup to any sale. Essentially, this program is co-wholesaling on STEROIDS!
